Disaffected Electricians Resign—

Fifteen of the nineteen electricians employed by the D. C. M. company resigned on the morning of Tuesday, August 11, their explanation for their action being that they could not become reconciled to having their wages reduced ten per cent, which reduction affected the every employee of the Company in every department. Apparently the electricians could not realize that the company, with all copper producers, has been seriously affected, as regards copper sales, by the results of the wars in Europe upon the copper industry, or else they were sticking for never accepting a wage reduction. The four electricians who would not resign with their fellow workmen were soon joined by men willing to accept the wages offered, and the Company's electrical department was soon fully manned. Reports were that the electricians who resigned will leave Morenci for other points where labor is expected to be found.

The Morenci physicians are authority for the statement that at present twelve persons are suffering of typhoid fever. This is about the average number of cases encountered at this season of the year.

Mountain Greenery—

The mountain views along the way between Morenci and Clifton are scarcely recognizable to the traveler whose acquaintance with the scenery has been limited to the views gained only during a number of preceding seasons, for the recent heavy and continued rains have mantled the hill-sides with a sea of greenery of shrubs and mountain plants, while flowers lend bright colors to the slopes.

Mr. Hutchins, of York, and a merchant there, visited at Morenci Tuesday and Wednesday, his coming here being to arrange concerning shipments of truck crops from his section of the Gila valley, he acting as commission man for the farmers there. All staple crops are of good yield, as are the truck crops especially. Much of the vegetables upon the Morenci tables come from the farms of York and adjacent points.

Wreck on Morenci Southern—

Passengers and mails on the Morenci Southern were on the afternoon of Friday, August 7, delayed for several hours from their arrival into Morenci, the cause being a slight wreck of the combination train leaving Guthrie in the afternoon.

The wreck, which occurred at a point near Frisco, and about nine miles from Morenci, was caused by the breaking of the trucks of a box car. A switch engine and a passenger coach were sent from Morenci upon the arrival of the news, and served to bring the passengers and mails into the town. The local trainmen soon succeeded in placing the misplaced cars again upon the rails, the train reaching Morenci at about one o'clock the following morning. The damage was slight.

South Portal to Palace of Food Products, Panama-Pacific International Exposition, San Francisco, 1915

Copyright, 1914, by Panama-Pacific International Exposition Co.

THIS portal is probably the most modern in feeling of any doorway in any of the main group of exhibit palaces. The portal is Italian Renaissance in form and treatment, but much of the ornamentation is of more recent origin. The photograph gives no idea of the great dimensions of this portal, which is sixty-six feet in height to the tip of the ornamentation surmounting the arch. The eagles above the line of pilasters of the portal are six feet in height. The Exposition palaces are constructed of grayish cream plaster in imitation of Travertine marble.
